VAT Compliance

The Problem: Unregistered sellers face frozen accounts, fines, and restricted access to UK/EU customers.

The AVASK Solution: Seamless, end-to-end VAT management.

- ✓ **Registration:** Accurate VAT registration across the UK and all EU member states.
- ✓ **Guaranteed Accuracy:** Expert filing ensures compliance with complex, constantly changing rules.
- ✓ **Tax Compliant Sales:** Sellers can list, sell, and expand without fear of tax audits.

VAT Requirements when Selling in the EU

VAT number in each country where you store products.

One-Stop-Shop

The Problem: Managing numerous VAT IDs and returns for distance B2C sales across the EU.

The AVASK Solution: Streamlined EU Distance Sales Reporting.

- ✓ **OSS Simplicity:** Report EU-wide distance sales with a single return, eliminating the need for up to 27 separate VAT registrations
- ✓ **IOSS Efficiency:** Simplify VAT for imports under €150, ensuring faster, duty-free movement and improved customer experience.
- ✓ **Maximised Profitability** on all direct-to-consumer EU sales.

EPR Compliance

The Problem: Extended Producer Responsibility (EPR) is increasingly mandatory, and non-compliance results in market exclusion in major markets such as Germany and France.

The AVASK Solution: Environmental compliance made simple.

- ✓ **Full Lifecycle Management:** We handle everything from product registration to reporting, covering key categories like WEEE, Packaging, and Batteries.
- ✓ **Stay Ahead of Legislation:** We constantly monitor new environmental policies, so sellers don't have to.
- ✓ **Sustained Market Access.** Ensuring sellers remain environmentally permitted to sell in key European countries.

EPR Compliance

Extended Producer Responsibility (EPR) holds producers accountable for their products throughout the entire lifecycle, from design to disposal, driving reduced environmental impact, sustainable design, greater recycling, and improved resource efficiency.

Sellers are considered responsible if:

They manufacture a product in the country and sell it domestically.

They import a product into the country where legislation is present.

They sell a product in a country where legislation is present.

On average, processing times are 3–4 weeks, but this may vary by country. Austrian timeframes are released quarterly.

GPSR Support

The Problem: The new EU General Product Safety Regulation requires a legally designated EU Responsible Person (RsP) and strict product safety labelling.

The AVASK Solution: Product Safety & Liability Assurance.

- ✓ **EU Responsible Person:** Support with the process of designating an EU Responsible Person (RsP) to oversee product compliance
- ✓ **Labelling & Traceability:** Ensure non-food/non-CE marked products meet current labelling, safety, and traceability standards.
- ✓ **Reduced Product Liability & Risk:** Protection from market bans and recalls due to non-compliance with new EU safety laws.

Customs Compliance

The Problem: Complex customs processes, unexpected duties, and clearance delays lead to stock-outs and a poor customer experience.

The AVASK Solution: Smooth, Predictable Cross-Border Logistics.

- ✓ **Comprehensive Brokerage:** Handling all aspects of the customs clearance process for both imports and exports.
- ✓ **Representation Flexibility:** Offering Direct and Indirect Representation to legally facilitate imports for all seller types (EU and Non-EU).
- ✓ **Tax Expertise:** Ensuring correct classification and duty optimisation.
